THE NEWEST HOME DÉCOR ACCENTS SPORT AN ON-TREND AESTHETIC MARRYING FEEL-GOOD, AFFORDABLE SHOPPING WITH HIGH DESIGN.

There was a time when the words “green design” made style mavens’ hearts shudder. Macramé plant hangers? Tie-dye bed sheets? Peace and love posters? Not so anymore. The best in eco-friendly items for the home ditch that hippie-crunchiness in favor of clean, sleek, modern lines that are of-the-moment in shape, color and style.

A classic ease and simplicity mark the most notable pieces. All are created with recycled or earth-friendly materials that reflect a durability and longevity, components that are essential to a going-green philosophy. And options abound for the whole house, from bath to bed to mealtime.

Finally, doing—and buying—the right thing feels good and looks even better.
